

[Bastianelli G, Mosna E, Canalis A \(1937\)](#). Prevention and treatment of malaria by synthetic drugs. Bulletin of the Health Organisation of the League of Nations 6:822-891.

Key passages

PREVENTION AND TREATMENT OF MALARIA BY SYNTHETIC DRUGS.

Field Experiments

carried out under the Direction of

Professor G. BASTIANELLI

by

Dr. E. MOSNA,

and

Dr. A. CANALIS,

(Malaria Laboratory,

(Institute of Malariology

Institute of Public Health, Rome)

“ Ettore Marchiafava ”, Rome).

Febrile patients yielding positive blood findings were assigned alternately to the atebirin and to the atebirin-plasmoquine group in the order of their arrival, irrespective of the degree of gravity of the case.
