

Personal reflection

[Crofton J \(2004\)](#). The MRC randomized trial of streptomycin and its legacy: a view from the clinical front line.

[Grimes DA \(2007\)](#). Discovering the need for randomized controlled trials in obstetrics: a personal odyssey.

[Guyatt GH, Oxman AD \(2009\)](#). Medicine's methodological debt to the social sciences.

[Jenicek M \(2006\)](#). Méta-analyse en médecine: the first book on systematic reviews in medicine.

[Jick H \(2008\)](#). Learning how to control biases in studies to identify adverse effects of drugs: a brief personal history.

[Klingberg MA \(2010\)](#). An epidemiologist's journey from typhus to thalidomide, and from the Soviet Union to Seveso.

[Peters L \(2006\)](#). James Lind's descendants.

[Peters L, Hepner J \(2009\)](#). George Chalmers' portrait of James Lind, 1783-2008: a reconstruction.

[Sackett DL \(2008\)](#). A 1955 clinical trial report that changed my career.

[Scadding JG \(2002\)](#). Reflections on my studies of the effects of sulphonamide drugs in bacillary dysentery in Egypt, 1943-1944.

[Silverman WA \(2003\)](#). Personal reflections on lessons learned from randomized trials involving newborn infants, 1951 to 1967.

[Stjernswärd J \(2009\)](#). Meta-analysis as a manifestation of 'bondförmuft' ('peasant sense').

[Vessey MP \(2006\)](#). Learning how to control biases in studies to identify adverse effects of drugs.
